

December 20, 2022

Dear Patient: **Kentucky Breast Care has left your plan's network. We're extending your in-network coverage to make sure your care isn't disrupted.**

Our mission is making sure you can get **high quality, affordable** healthcare. One way we do this is by negotiating the rates we pay doctors and hospitals for your care.

**There are three in-network, fully certified breast imaging centers in your area**

Lake Cumberland Hospital Radiology  
305 Langdon St.  
Somerset, KY

The Imaging Center  
45 Tower Circle  
Somerset, KY

Russell County Hospital Imaging Center  
153 Dowell Rd.  
Russell Springs, KY

**FACT CHECK:**

What is more **affordable**?

What is **high quality**?

These “**certified**” centers are not Subspecialized\*:

- **Zero Breast Radiologists**
- **Zero Breast Surgeons**
- **Zero Breast Pathologists**

**COMPARE Apples to Apples:**

	<b>KBC</b>	<b>FACILITIES ABOVE</b>
COST of a 3D Screening Mammogram:	\$287	\$382
Breast Fellowship-Trained Radiologists:	Yes	NO
Hours of <u>Subspecialized</u> training:	>10,000	None Required
Mammograms read/year:	>12,000	>480
YEARS OF 3D EXPERIENCE:	>10 YEARS	1-3 YEARS

\*A subspecialist has at least an additional year of formal breast cancer training at a university. Subspecialists find cancer earlier.

*Analogy: When you fly on an airline, you expect the pilot to have specialized training on that aircraft... not just anyone with a basic pilot's license.*
